SETUP

1. Each player takes a 0-value fake money card and a player aid. Return unused fake money cards to the box.
2. With fewer than 5 players, remove money cards from the game as follows:
   - **2 or 4 Players:** Remove all cards of any **1** currency (9 cards). *See page 6 for 2-player rules.*
   - **3 Players:** Remove all cards of any **2** currencies (18 cards).
3. Shuffle all remaining money cards together with all gold and silver cards. Deal each player a hand of **6** cards. Each player adds their fake money card to their hand.
4. Place the deck on the market board in the middle of the table. To create the **market,** deal **2** faceup rows of **4** cards each to the left and right of the market board *(marked as "I" and "II").*
5. Place the scoreboard and marker to 1 side of the market.

GAME ROUNDS

The game is played in rounds. Each round has the 3 steps:

1. Place Bids
2. Player Turns
3. Round End

1. PLACE BIDS

Players start each round by secretly selecting 1 or more cards from their hand to **bid.** Place the cards you want to bid facedown in front of you.

The **value** of your bid is the sum of the values of all cards in your bid *(including money, gold, and silver).*

When all bids have been placed, everyone reveals their bid by flipping their selected cards faceup.

2. PLAYER TURNS

Players take their turns in order from **highest to lowest bid.** On your turn, you must do one of the following:

- A **Swap with the market:**
  Swap all cards in your bid with all cards on **one side** of the market board.
- B **Swap with a player:**
  Swap all cards in your bid with all cards in another player's bid.
  The cards you place in front of that player are now their bid.
- C **Keep:**
  Decline to swap and keep all cards in your bid.

After swapping or keeping your bid, take all cards in your bid **into your hand.** The player who has the highest bid left on the table takes their turn next.

Note: After you swap with a player, that player will have the highest bid and take the next turn.

TIES

Whenever there is a tie for highest bid, each tied player checks the **serial numbers** on the cards in their bid. Whoever has the **lowest** serial number takes their turn first.

FAKE MONEY

Each player has a fake money card with **0 value** that they can use to hide how many "real" cards they bid. When bids are revealed, each player who reveals their fake money immediately returns it to hand.

3. ROUND END

When there are no more cards in front of players, the round ends. Any cards left in the market **stay there.**

Next, deal new faceup cards from the deck to **refill** each side of the market board up to 4 cards. If a side already has 4 or more cards, don't add any more. If there are not enough cards left in the deck to fill both sides, fill **side I** first, then **side II.** Then, start the next round.

GAME END

If the **last card** in the deck is dealt while refilling the market, play **1 more round,** then proceed to final scoring. *There will usually be fewer than 4 cards on one or both sides of the market board at the start of the last round.*

FINAL SCORING

At the end of the game, each player reveals their hand and follows the steps on the next 2 pages to add up their final score. The player with the highest score wins. In a tie, victory is shared.

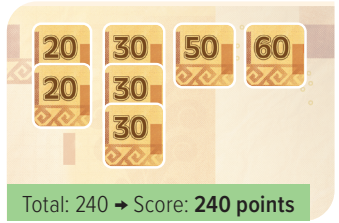

SCORING EXAMPLE

	PI
$	40
₹	
£	0
¥	
P	240
F	
$	
	90
	200
Total	570

This player scores a total of 570 points.

A SCORE CURRENCIES

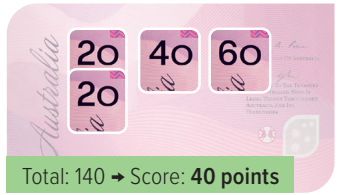

For each currency, add up the **values** of all cards of that currency in your hand, then score as follows:

Total: 240 → Score: **240 points**

STRONG POSITION (200-300)

If you have at least 200 of a currency, score points equal to the **total value** you have.

Total: 140 → Score: **40 points**

MODERATE POSITION (110-190)

If you have more than 100 but less than 200 of a currency, you must pay a commission. **Subtract 100** from the total value you have and score points equal to the result.

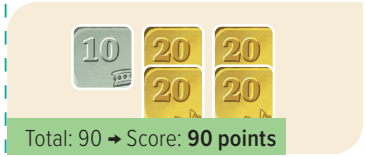

Total: 60 → Score: **0 points**

WEAK POSITION (0-100)

If you have 100 or less of a currency, it's worthless to you. Score 0 points.

B SCORE GOLD & SILVER

Add up the values of **all** your gold and silver cards and score points equal to the total.

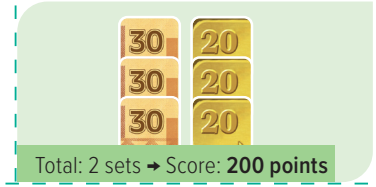

Total: 90 → Score: **90 points**

C SCORE SETS OF 3

Score a 100-point bonus for each set of 3 **exactly matching** cards you have. This includes:

- 100 per 3x **20s** of same currency
- 100 per 3x **30s** of same currency
- 100 per 3x **gold**
- 100 per 3x **silver**

Total: 2 sets → Score: **200 points**

TIPS & REMINDERS

- Do **not** count set bonuses when determining the highest bid **or** your position in a currency.
- Each currency has **3x** 20s, **3x** 30s, and **1x** each of 40, 50, and 60. Collecting all **9** cards of a currency is worth **500** points total *(300 value + 200 set bonuses).*
- You can score bonuses for sets of 20s or 30s of a currency even if you have a **weak position** in it.

2-PLAYER RULES

Each player may use their **fake money** card to separate their selected cards into **2 bids** each round. The cards you reveal to the left and right of your fake money card are treated as separate bids. If you reveal cards on only 1 side of your fake money card, you only make 1 bid. Play progresses as usual, with each player taking 1 turn for **each** of their bids.
